

CREATING A TRULY ADAPTIVE WORKPLACE >>

DELIVERING CONTINUOUS IMPROVEMENTS IN END-USER PRODUCTIVITY

'Doing more with less' is always one of the main drivers for workplace outsourcing, however, no longer is cost reduction and transparency the primary or sole business driver. Solving the dynamic business model challenge is high on the CEO's agenda whilst ensuring continued stringent security, high availability, mobility and compliance are achieved.

This is why many major companies and organizations have selected AtosTM Workplace Solutions. The Adaptive Workplace delivers a truly agile framework that allows an enterprise to respond quickly to changing business conditions through a combination of highly responsive service levels and a high level of service automation. It also addresses the concerns many companies have surrounding the selection, implementation, integration, or upgrade of components for their end-to-end workplace environment. As a European leader in Service Desk and Desktop Outsourcing Services let us show you how.

INCREASING END-USER SATISFACTION

The Adaptive Workplace combines the breadth of Atos Origin solutions for workplace, identity & security and infrastructure management. It provides intelligent orchestrated access to any communication, collaborative or business application. These are delivered in different ways depending on the end-user's, location, identity and connection type. The Adaptive Workplace sees the traditional split between the enterprise environment and the Internet disappear. For the end-user this means that any application can be used anywhere, anytime and on any device. This device could be a traditional PC (rich client), thin client, virtual client, or even the users personal device.

AN INNOVATIVE SERVICE PLATFORM AND HUB

The Adaptive Workplace from Atos Origin does this by providing a Service Platform, from where the best combination of services can be selected, including the integration of online services. The creation of a Service Hub, which provides a single point of access for end users, orchestrates the automated provisioning of applications, secure access and workplace services through a portal, that combines a series of easy to navigate self service tools & online catalogues.

The solution is based on proven standards, defined by Atos™ Workplace Solutions, developed through the integration of proven technology. Furthermore, it is modular and can be deployed at a pace that allows an enterprise to adopt the technology when they are ready, with minimal risk and full guidance from Atos Origin along the journey.

BENEFITS BASED ON PROVEN EXPERIENCE

The Adaptive Workplace solves issues around the selection, implementation, integration and upgrade of components within the end-to-end office environment. Additional workplace services, such as unified communications and collaboration services, can also be seamlessly integrated into the offering to maximize end-user productivity. Clients also benefit from Atos Origin's end-to-end service delivery capability, based on a mature and well-balanced global sourcing model that meets both global and local customers' requirements.

A DYNAMIC WORKPLACE SOLUTION

The Adaptive Workplace provides a dynamic workplace solution that supports the business and will help companies

realise the following benefits:

- » Reduced operational costs, but with demonstrable value (ROI)
- » High levels of end-user productivity & experience
- » Enhanced agility - the ability to quickly implement change
- » Creation of a sustainable (green) workplace
- » Leverage the benefits of new delivery models
- » High levels of security and compliance.

DELIVERING CONTINUOUS INNOVATION AND INVESTMENT

A key element of the Adaptive Workplace approach is the 'continuous innovation' process is managed centrally by Atos Origin and aligns functionality changes between architecture, services and portfolio. Continuous input to the innovation process drives the creation of a technology roadmap which is developed together with our leading partners, including Intel and Microsoft. Furthermore, the continuous adaptation of off-the-shelf solutions to meet individual needs makes this a highly flexible solution, whilst remaining truly cost-effective.

Atos Origin is also one of the only global IT services providers able to offer the full range of IT and application services within a fully integrated solution. Using its own resources to deliver the end-to-end solution, Atos Origin retains essential control over planning and implementation to ensure the highest quality result and making issue resolution more efficient.

ATOS IN A BOX

Based on the Adaptive Workplace, Atos in a Box is a special offering from Atos Origin focusing on the SME market.

Products are specially developed for enterprises with up to 500 automated workplaces and consist of stackable products which work together seamlessly.

“A KEY ELEMENT OF THE ADAPTIVE WORKPLACE IS THE PROVISION OF SERVICES IN COMBINATION WITH INNOVATION.”
